OBJECTIVE

To discharge my duties to the best of my abilities so as to reach the goals that will help in the development of the organization and also, to ensure a good relation with my co-workers in the organization.

Animal nutrition aims are to increase and promote the understanding of the effect of diet on the health, wellbeing and productivity of animals. Animal nutritionists are mostly active in the field of agriculture, where they provide advice and information on animal nutrition, as well as designing and evaluating the diets of the animals in question. Animal nutritionists may also be involved in the production of food for zoo and companion animals (pets), and give advice on issues related to feeding them.

EXPERIENCE

2017-2020

Bolus farms and agricultural consults

Farm manager/ Freelance Agent

- I was responsible for the management and general maintenance of the farm
- I supervised the general care of the animals and diligent in the control of their illness
- I was able to market the farm products and keep income steadily made by the farm

2018-2019

Federal College of Animal Health and Production Technology

Assistant Lecturer (National Youth Service Corps)

- I conducted group and private tutoring to students in need of additional help in understanding principle
- I designed additional power Point lectures and writing activities to supplement the regular curriculum to help students in their learning
- I prepared lesson plan, evaluation plan, examination question for students, conduct written and practical examination
- I also supervised undergraduate projects
